

Personal Statement

Positions I am interested in the student senate are Inter Club Council Chair and At Large Representative. As I have spent the last year representing MOVEMENT Club as the ICC Rep, I got to learn a lot about duties and responsibilities that the ICC has when it comes to managing and organizing student life. I enjoyed representing my fellow students and contributing to the community through leadership and working alongside other students and faculty to try and help support those at our school. I also enjoy participating in leadership roles at Chabot, including MOVEMENT Leadership, Mentorship, and club activities. I enjoy planning and organizing events, running meetings, and reaching out to others to network.

I've been at Chabot for almost 2 years and I have gotten to experience many aspects of campus life in my college experience. I am currently an engineering major with additional interests in business and ethnic studies. I chose engineering as I had always had a passion to create and build. I love the ideas of fixing things that were broken, and constantly making improvements to things which held the potential for more. I loved making the most of things, and trying to constantly improve. I believe there are no limits to the potentials of life, and I have goals to make the most of what I am given. I also love business as it has taught me about communication, negotiation, social life, and economics. A combination of these two things has taught me how to lead others and find solutions in different circumstances.

I would describe myself as “dedicated”, “passionate”, and “encouraging”. I am a person who has a strong will and determined work ethic, who is always willing to try new things and learn more. I care deeply about the things I do and try hard to complete things with the best intentions for those around me. I like to uplift others in a positive and productive way to build community and support those around me.

I want to continue to support my school community by helping a variety of students from different backgrounds, and give them a place where everyone can feel like they belong. I want to help the school create an environment in which students and staff are able to get the most out of their time here, and foster a place that brings out the best in others. As a member of the SSCC, I can have a positive impact on students, teachers, and administration as I show them support and encouragement while constantly trying to pursue growth within each of our own academic and life journeys.
