

Julian Duong

I'm interested in the "At Large Representative" position as I've always found community and communication important and as a representative, I can reach out to students' concerns and ways to improve our living standards here at Chabot. My major is Business Administration. I picked it because I have varying interests in multiple fields such as IT, fashion, finance, and more. I feel that this major and its curriculum encompasses all of my interests. Three adjectives I would describe are caring, as I always try to think about others' well-being and concerns, enthusiastic, because I always try to put as much energy and passion into what I love doing, and grateful because I always try to be grateful for the opportunities I get to have and the people that support me to where I am now. One goal I would like is to overall improve campus life overall and maintain general student support that can reach our student body and know that they can be provided with additional support whether it's to improve their personal life or academic life.
