1) The positions that I am interested in are At Large Representative and Vice President of Government Relations. As these positions offer an opportunity of leadership, as well as representation of other students as a Student Senate, as well as making impact and changes as I represent students from Chabot College. It also offers a place where I could step out of my comfort zone, learning from other people in order to improve myself. I would like for my voice to be heard as a community college student, and I want to represent other students by doing so.

2) I am majoring in sociology, as I am interested in pursuing a higher degree in Counseling, as I am interested in becoming a Counselor.

3) Three adjective that I would use to describe myself are

Open-minded: I am open to learning and accepting new things that come to me, and would love to receive constructive feedback that would allow me to grow and become a better person of myself, as well as not taking the feedback personally.

Adaptable: I am able to adapt to new things quickly as I can learn and apply the things that I learn into the situations that I get to experience. I am open to work independently, as well as being a part of a team, as a team member as well as a leader.

Detail-oriented: I pay attention to the small things that would be beneficial to me as well as others. I stay organized by keeping a record of what I do, and label it so I will not have trouble finding it or finishing it later on. I would also notice the small things that might affect other people and change it.

4) One goal I would like to achieve is to enhance better mental health support and resources on campus. Even though Chabot college does offer Mental Health services and therapy, it is still not enough. I would love to propose my idea in order to organize campaigns and workshops that are focusing on spreading mental health awareness, and create a better environment where everyone feels they belong.
