

Vy Dao

Hi! My name is Vy Dao, I'm currently a Business major with a food business that I'm currently running! When I declared my major as business, I understood that it is a very competitive industry. But at the same time, it is a very versatile degree, you could be involved in tech, sales, management, law, or education. On the other hand, with this degree, you get to build something of your own. What appeals about business is that you get to see the development stage, building process, and the involvement of many people in creating one business.

But now, I will be running to be your next SSCC Student Trustee Representative and at Large Representative for the next school year of 2024 to 2025. During my time, at Chabot College, meeting a variety of people and creating new friends. The word "extrovert" is commonly used to describe myself and my approach toward people. My goals when meeting new people are to get to know them, understand them, and create the best memories in the short time that we have. I am now bringing the same intention to run for the Chabot Student Trustee and at Large Representative. I understand to be a Student Trustee Representative and at Large Representative, I will be at the table representing you all. Therefore, I want to understand and identify the needs, the wants of the Chabot students and ensure it is on the agenda. If I were chosen to be your representative, I want to acknowledge the undeclared students and the non-popular majors. I want to bring and provide more hands-on experience. I want to create a small research committee focusing on internships and apperentienship. Thus, opens a space for students to experience and learn about themselves. By voting for me, you are allowing me to serve, you gave me a chance to grow, a chance for us to grow, and give the district a chance to understand the life of Chabot students. Another word I picked to describe myself is the word "enthusiastic". Sounded a little weird, but I enjoyed working. Not just for anything, but particularly for the community. I like working with people seeing their ideas, hyping them up, and creating long-lasting friendships. I like to find creative solutions or compromise to a problem. It excites me to know, I'm in a community that supports each other and supportive of their students. The last word that I chose to describe myself is "ethical". To work, everyone should have a set of moral principles. Doing what is right and what is fair, they go a long way in your life. I'm proud to say that I have a set of principles to guide me, I will apologize when I'm wrong, I will be honest with you and I will give you the opportunity you deserve.
